

# Secure your Hybrid Infrastructure

Maximise your Hybrid MultiCloud ROI:  
Powered by Nutanix, CloudBolt, and StrongDM

Offers hyper-converged infrastructure (HCI) solutions to simplify datacenter operations and enhance scalability.

Serves as a cloud management platform, managing and brokering different cloud environments and services.

Manages access and auditing across any infrastructure, ensuring secure connections to physical, virtual, and database infrastructure.

## SECURE & SCALABLE IT: Nutanix, CloudBolt & StrongDM Combined

### Purpose

Automate the provisioning and management of Nutanix HCI resources.

### Mechanism

CloudBolt acts as a broker to Nutanix's APIs to manage Nutanix environments directly.

### Workflow

- CloudBolt receives commands from ServiceNow to deploy or manage Nutanix resources.
- CloudBolt executes these tasks using Nutanix's APIs, ensuring seamless HCI operations.

### Purpose

Provide a secure, audited access layer to infrastructure managed by Nutanix and CloudBolt.

### Mechanism

StrongDM proxies and logs all administrative sessions initiated through ServiceNow or CloudBolt.

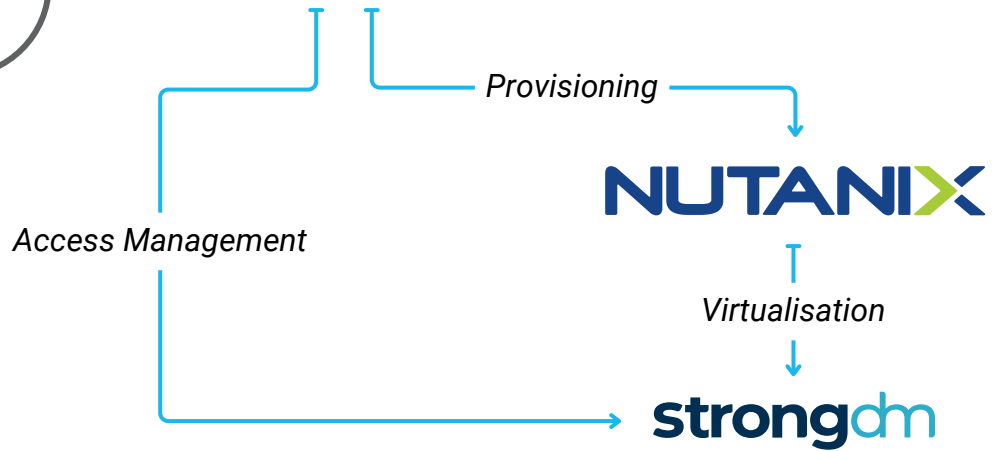

### Workflow

- Administrators access Nutanix or cloud environments managed by CloudBolt through StrongDM.
- All sessions and commands are logged for security and compliance.

## COMPLETE IT CONTROL

CloudBolt<sup>®</sup>  
software

## VALUE AND BUSINESS OUTCOMES

### Enhanced Security

Robust access management and monitoring ensure secure and compliant access to critical systems and data.

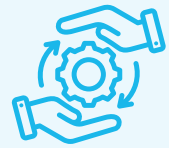

### Scalability

Easily scale infrastructure and cloud resources to meet growing business needs without compromising on control or security.

### Cost Optimisation

Efficient resource management and cost tracking help optimize cloud spending and improve ROI.

### Simplified Management

Centralised control over hybrid and multi-cloud environments with automated workflows and streamlined operations.

## BENEFITS

### Streamlined Operations

Automate IT operations and resource management, reducing manual efforts and improving efficiency.

### Enhanced Security and Compliance

StrongDM ensures secure, logged, and compliant access across all managed environments.

### Agility and Flexibility

Quickly adapt to changes in demand with CloudBolt's cloud management and Nutanix's HCI scalability.

**This architecture enables a robust, scalable IT infrastructure that leverages the strengths of each platform to enhance service delivery, security, and operational efficiency.**
