A PLATFORM & ARCHITECTURE TO CODIFY & DELIVER
A DISTRIBUTED SET OF SERVICES AS CODE.

01 Extensible architecture and framework for anything-as-a-service

02 Fully codifying platform and infrastructure services

03 Then turning the infrastructure-as-code into a service itself

04 Multi-tenanted and customizable service architecture

05 Zero-touch fully automated remote platform build (<24 hrs!)

06 Service lifecycle management and version control using Git

**07** Rapid development and release cycles creating business agility

08 Cloud monitoring service and dashboards

09 ITSM and service catalog integration

SCALABLE ARCHITECTURE TO DELIVER XAAS
