XaaS-as-a-Service

METSI

A PLATFORM & ARCHITECTURE TO CODIFY & DELIVER A DISTRIBUTED SET OF SERVICES AS CODE.

01
Extensible architecture and framework for anything-as-a-service

02
Fully codifying platform and infrastructure services

03
Then turning the infrastructure-as-code into a service itself

04
Multi-tenanted and customizable service architecture

05
Zero-touch fully automated remote platform build (<24 hrs!)

06
Service lifecycle management and version control using Git

07
Rapid development and release cycles creating business agility

08
Cloud monitoring service and dashboards

09
ITSM and service catalog integration
